1. Introduction

- Message from our CEO
- 2024 at a glance

Message from our CEO

AOKE Europe is a pan-European leader in ergonomic office furniture, dedicated to improving well-being and sustainability across all aspects of its operations. As CEO of AOKE Europe I am pleased to welcome you to our CSRD Report 2024. We are looking back on a year of innovation: from expanding our product range to new technologies to starting new businesses.

The theme of this year's report 'Shaping our sustainable strategy', reflects the importance of the steps we are taking and our role in contributing to lasting positive impact.

The 2024 CSR & Sustainability Report presents AOKE's carbon footprint results, its environmental, social, and governance (ESG) initiatives, and outlines the company's forward-looking goals for 2025–2035.

In 2024, AOKE Europe achieved significant milestones in sustainability:

- Energy efficiency level of A+++ of our headquarters in Herten
- Comprehensive GHG measurement through Greenly
- Continued ISO certifications for our production processes (ISO 9001, ISO 14001, ISO 45001)

The report also highlights initiatives focused on ergonomic innovation, employee well-being, and ethical supplier engagement. Personally, I look forward to see how we make AOKE more sustainable than ever.

Joeri Drenth
CEO / Owner

2. About AOKE Europe

AOKE Europe B.V. is a fast-growing organization headquartered in Herten, the Netherlands. With a strong position in the ergonomic office furniture market, AOKE Europe recorded €22 million in revenue in 2024 and employs 11 people.

AOKE's new 5,500 m² facility operates fully electric and was constructed under the highest environmental standards, earning an A+++ energy label.

AOKE Europe is the exclusive importer of AOKE Ningbo (China) for the European market, working in close collaboration with our manufacturing facility in China. Ensuring consistent quality and reliable supply for its partners.

2.1 Mission and Vision

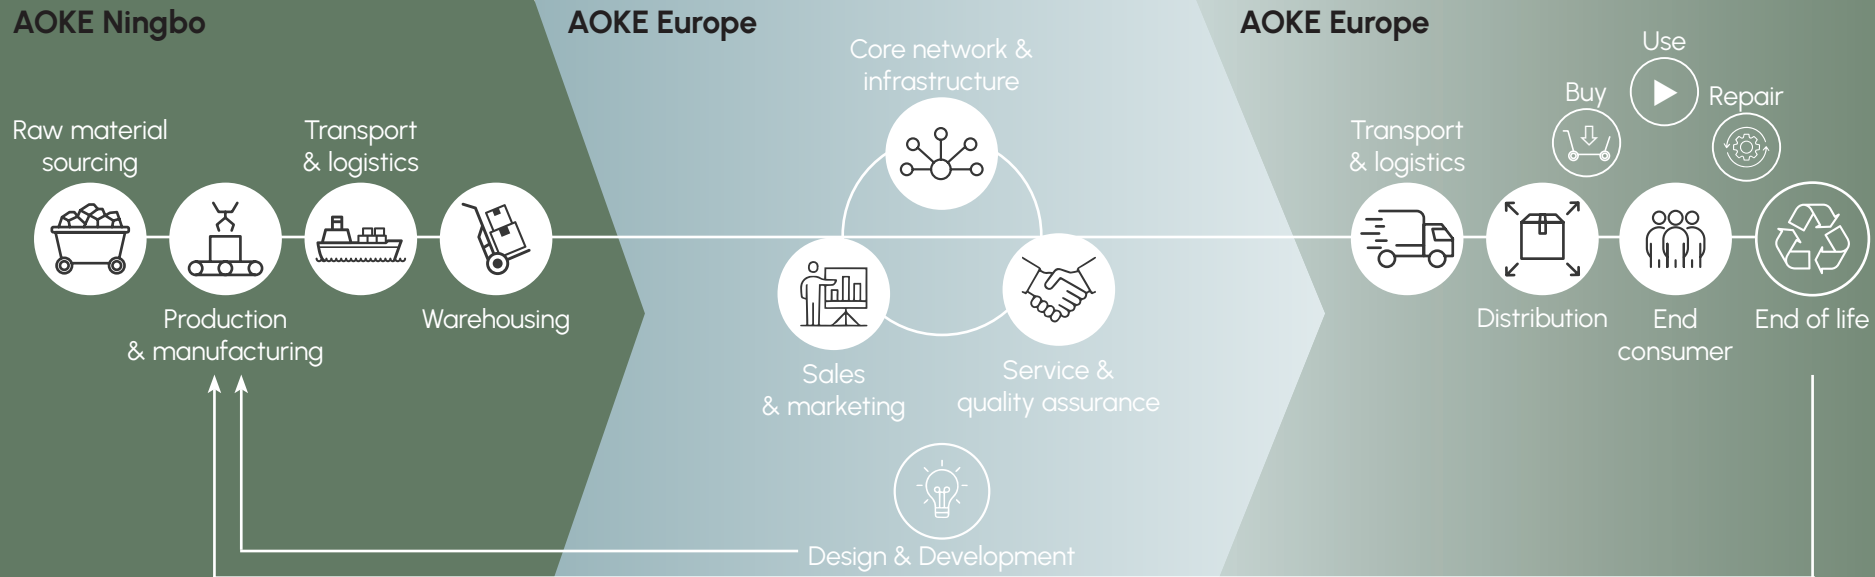

Mission

At AOKE we develop and provide our customers with high-quality, ergonomic office equipment in order to promote the well-being and productivity of office employees. Supported by our high service level and fast delivery times we offer an excellent experience for our customer.

Vision

While being a leader in sustainability we promote a healthy office environment on a global scale with high quality equipment. We are anticipating on the latest trends in the industry by focussing and investing in R&D. We keep replacing old fashioned office equipment by our modern, ergonomic products, so employees will be happy to come to work every morning.

2.2 Value chain model

3. Environmental Responsibility

Summary

In 2024, AOKE Europe completed its Greenly-based greenhouse gas (GHG) emissions assessment. The company's total emissions amounted to 7,600 tCO₂e, with Scope 3 emissions (purchased goods and freight) representing the majority of the footprint.

Greenly is an EU-accredited company specializing in carbon accounting and sustainability solutions. Its accreditation ensures that the methodologies and data it provides meet strict European standards. As a result, Greenly's data is highly reliable and trusted.

Through continuous monitoring and offsetting programs, AOKE Europe ensures that container transport emissions from Ningbo, China to Herten are fully compensated. The company also utilizes 100% cardboard packaging (45% recycled) and implements recyclability standards across all materials, with steel, aluminum, plastic, and rubber getting close to 100% recyclability.

3.1 Energy and Facilities

AOKE Europe's headquarters in Herten is one of the most energy-efficient logistics hubs in Europe. With an outstanding A+++ rating given by the Dutch government for its energy efficiency and environmental performance, achieving a 31.7% share of renewable energy.

Following further improvements, the expansion to retrieving an A+++++ rating reflects the next step in enhancing our sustainability performance. The site operates entirely without gas, is fully electric, and is partially powered by solar energy. With 336 solar panels installed on the roof, we expect to cover a large share of our energy consumption with sustainable solar power.

This investment underlines our commitment to reducing CO₂ emissions and promoting greener business operations.

3.2 Circular Materials and Recyclability

AOKE continuously evaluates material lifecycles to reduce waste and promote circularity. All major materials used in production are 100% recyclable. More than 80% of the steel used in our production is recycled, and our production processes in China are certified according to ISO 9001, ISO 14001, and ISO 45001.

We use 100% recyclable cardboard packaging in compliance with ISO 14021:2016 requirements. Packaging optimization and increased use of recycled input materials are ongoing priorities.

3.3 LCAs

AOKE is committed to reducing emissions through close collaboration with suppliers and the systematic use of life cycle assessments (LCAs). To date, LCAs have been completed for eight of our products, and we aim to expand this effort by conducting additional assessments across our remaining product categories.

3.4 Transport and Compensation

Transport is one of the largest sources of CO₂ emissions, as reflected in our GHG report. To mitigate this impact, we compensate our transport-related emissions through our partnership with Rotra. Through this certificate, we invest in certified projects that contribute to measurable CO₂ reduction, such as renewable energy initiatives, reforestation programs, and energy-efficiency projects. The certificate provides verified and transparent proof of our climate efforts and supports our broader corporate social responsibility and sustainability objectives.

2024 CO₂ offset: 948.686 KG
through the Rotra compensation program.

4. Social Responsibility

4.1 Internal CSR Initiatives

At the core of AOKE Europe's mission lies ergonomic well-being. The company's products are designed to promote comfort, reduce strain, and improve productivity. Internally, AOKE fosters a supportive and health-oriented workplace culture.

AOKE offers an in-house gym to promote physical fitness, organizes quarterly team-building activities, and developed the Ergomate application to raise ergonomic awareness. This initiative helps employees and partners use equipment in the healthiest and most efficient way possible.

Workplace safety is paramount and a very important factor at AOKE Europe. The company employs a prevention officer, provides safety training, and has reported zero incidents since relocating to the new facility.

4.2 External CSR Initiatives

PSW

PSW gives talented people, with a distance to the labour market, the opportunity to gain valuable experience in our work environment. Through their work, they directly contribute to the quality of our products and the service we deliver to our customers.

It's this kind of collaboration that shows how business and social impact can go hand in hand. PSW creates opportunities, and AOKE Europe is very proud to be part of that. PSW helps us with printing and cutting our product manuals, fold our variety of cardboard wrappings and pre-pack our spare parts and components.

Specters Coffee

Specters Coffee collaborates with Make-A-Wish Nederland. With every cup of Specters you drink, you directly contribute to fulfilling the heartfelt wishes of children living with life-threatening illnesses. AOKE Europe is proud to support this foundation and exclusively serves Specters Coffee.

Meet the Youngsters

A career platform that connects young people, educational institutions, and businesses in the Euregio Maas-Rijn. By linking talent with authentic stories, they create lasting relationships and strengthen the region as a breeding ground for innovation, development, and opportunity.

meet
the
youngsters®

5. Governance

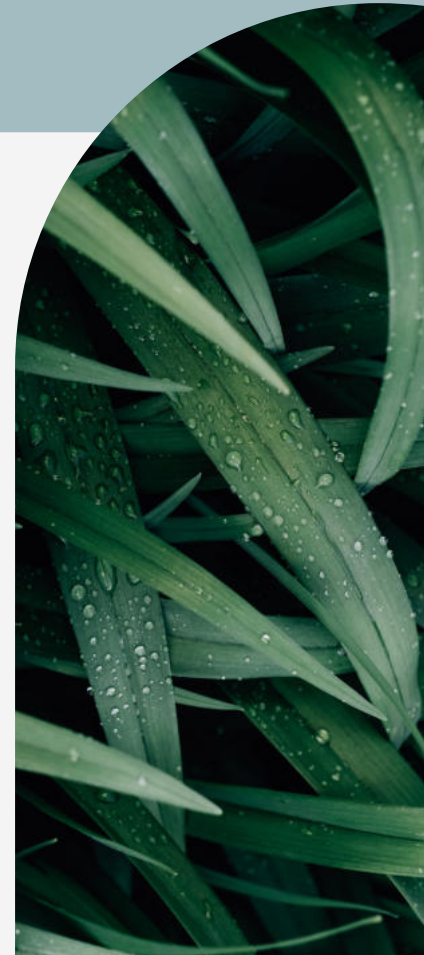

AOKE Europe's governance model is built on transparency, integrity, and accountability. The management actively oversees all operational processes, ensuring compliance with regulations and internal standards.

The company maintains strong supplier relations and expects partners to uphold ethical labor practices, equality, and environmental care. AOKE's internal risk management framework includes production oversight, supply chain monitoring, financial stability, and quality assurance through certified systems.

6. Sustainability Goals 2025-2035

The following strategic goals guide AOKE Europe's CSR direction:

Area	Goal	Target Year
Employee Well-being	Reach 100% employee participation in wellness programs and Ergomate	2025
Supplier Engagement	Launch supplier sustainability questionnaire	2026
Certification	Maintain ISO 9001/14001/45001. Retrieving Gold Ranking in Greenly assessment.	2026
Packaging	Increase recycled content in packaging to 80%	2028
Energy	Transition to 50% renewable electricity at AOKE Europe operations	2030
Carbon	Develop a carbon reduction roadmap; achieving -3.5% annual emission reduction	2035

7. Monitoring and Continuous Improvement

AOKE Europe will continue to monitor its progress through annual GHG assessments, supplier feedback, and employee engagement metrics. The CSR committee will review all goals annually and publish updated CSR results on AOKE's website.

Based on the insights in this CSRD report, we aim to further strengthen our sustainability efforts across our operations and supply chain. By taking responsibility for our environmental footprint, we contribute to building a greener and more sustainable world for future generations. Through transparent reporting and continuous improvement, we remain committed to achieving measurable progress year after year.

Geräteidentifikation

Product Identification

Produkt: Lifting Table
Product: (Hand operated devices)
Modell: Modelle sind auf nächste(r) Seite(n) gelistet
Type designation(s) are listed on the next page(s)
Technische Daten: System boundary: Cradle to Grave
Technical Data: Data period: 2024.01.01 to 2024.12.31
Test Method: Product Environmental Footprint 3.1,
IPCC 2021 GWP100 V1.03, SimaPro 9.6.0.0
Functional unit: 1 set hand operated devices (AKZVYT-TVZB3-M02)
with reference service life 5 years operation in power input
(2 mins/day with 216W)
LCA impact assessment: next page, refer to report CN254PKS-001

Gültig bis: 2026-12-02
Date of expiry:

Gültig ab: 2025-12-03
Valid from:

Ausstellungsdatum: 2025-12-03
Date of issue:

Zertifizierungsstelle:
Certification body:

Yonggang Li

Das Zertifikat legt unsere Prüf- und Zertifizierungsanforderungen fest.
Das Produkt entspricht den o.g. Anforderungen, die Herstellung wird überwacht.
This certificate is based on our Testing and Certification Regulations. The product
fulfills above mentioned requirements, the production is subject to surveillance.
